    Aron Sousa, M.D.
    Senior Associate Dean for Academic Affairs
    College of Human Medicine

FROM: Wanda D. Lipscomb, Ph.D.
    Associate Dean for Student Affairs

SUBJECT: Results of the 2014 National Resident Matching Program and Residency Placements

The results of the 2014 residency match process and other residency placements are reported in this memorandum. The National Resident Matching Program (NRMP) reported results for the Michigan State University College of Human Medicine on March 21, 2014. The results of the match and other residency placements, including the Military Match, are summarized in the highlights below.

Highlights of the 2014 Residency Match and Appointments are as follows:

- There were one hundred and ninety (190) 2014 senior students seeking residency positions.
- One hundred and eighty six (186) of the seniors participated in the National Residency Matching Program (NRMP) including two (2) students in the Advanced Match who needed PGY 1 positions.
- There were four (4) seniors who participated in the Advanced Match and six (6) seniors who participated in the Military Match that occurred earlier in the 2013-14 academic year. One hundred percent (100%) of these seniors were successful in securing residency placements.
- Overall, 97.8% (186/190) of the CHM seniors secured a residency placement when you include the students who secured a residency position during the Match, the post-Match, the Advanced Match and the Military Match. Information regarding these seniors is included in the attached tables.
- Eighty five (85) students or 45.7% of the overall 2014 graduates are entering a primary care residency (i.e., Family Medicine, Medicine, Medicine/Pediatrics, and Pediatrics). This is slightly higher than the 43.8% who entered primary care in 2013.
- Thirty-six percent (36%) of the 2014 seniors will remain in Michigan for their residency training programs. This represents an increase from the 29.9% of 2013 seniors who remained in state.
➢ Of the graduates who will remain in the state of Michigan for training in 2014, 45.7% will be training in primary care compared to 48% in 2013.

➢ The top six specialty placements in rank order by percentage are listed below.

- Family Medicine (29 graduates, 15.6%)
- Internal Medicine (29 graduates, 15.6%)
- Pediatrics (23 graduates, 12.4%)
- Emergency Medicine (22 graduates, 11.8%)
- General Surgery (16 graduates, 8.6%)
- Psychiatry (13 graduates, 7.0%)

The CHM match results are aggregated in the college tables noted below and attached to this memorandum. You will also find a list of the residency placements in the attachment.

Table I: Percentage of Students Appointed by Block III Community
Table II: Specialty Choice and In-State/Out-state Location of Residency
Table III: Specialty Choice by Block III Community
Table IV: For Graduates Remaining in Michigan -Specialty Choice by Location of Residency
Table V: For Graduates Remaining in Michigan Block III Community by Location of Residency
List of residency assignments in alphabetical order by specialty without student names

Thank you for your attention to these highlights. Attached to this memorandum you will find the annual Match Tables that summarize information in various ways.
