

RADIOLOGY

ELECTIVE NAME:

Diagnostic Radiology

COURSE NO:

RAD 609

INSTITUTION:

Midland Radiology Associates
Midland Medical Center - Midland

OBJECTIVES:

- The student will learn the proper use of diagnostic procedures in radiology.
- The student will become familiar with the diagnostic radiology subspecialties.
- The student will gain a broad knowledge of radiology literature.
- The student will understand how the radiologist can help the clinician diagnose and treat disease.
- The student will know the indications for various radiographic examination, their capabilities and limitations.

DESCRIPTION:

The student will be exposed to all areas of diagnostic radiology including various types of special radiology procedures. The student will observe a variety of x-ray procedures to include: routine chest, extremities, skull, abdomen, barium enema, upper G.I., angiography, myelography, etc. Daily review and discussion of assigned teaching cases in radiology learning files.

Rotation Schedule:

The student will rotate through various departments including: General radiology, Fluoroscopy, Nuclear Medicine, Ultrasound, Neuroradiology, Emergency Radiology (ER) and will report to a resident when available. When a resident is not available on the service, the student will report to an assigned attending.

EVALUTION:

Preceptor(s) will be asked to submit a written evaluation at the conclusion of the clerkship. Faculty are encouraged to provide ongoing feedback throughout the elective rotations.
